Full intelligence — Summit Peak Roofing LLC

Generated: 2026-07-28

Website: <https://www.summitpeakroofing.example>

1) Executive summary

Summit Peak Roofing LLC is a residential roofing contractor in Denver, CO with a 4.6 Google rating across 87 reviews and a lead score of 78/100. Live homepage signals show a usable site, but thin service copy, missing LocalBusiness schema, and a weak quote CTA leave demand on the table. The strongest agency offer is a 30-day package: technical SEO cleanup, city/service pages, Local Services Ads readiness, and a review engine.

2) Business & local presence snapshot

- Industry: Roofing
- Location: Denver, CO
- Google: 4.6 (87 reviews)
- Owner contact: found on site About page (medium confidence)
- Social: Facebook present, Instagram thin, LinkedIn company page missing
- Years in business estimate: 9

3) Website & technical SEO findings

- HTTPS: Yes
- Title tag: Present but generic ("Home | Summit Peak")
- Meta description: Missing
- Viewport / mobile: Present
- Canonical: Missing
- Open Graph: Partial
- JSON-LD / LocalBusiness schema: Missing
- H1 count: 2 (competing headlines)
- Content depth: ~180 words on homepage
- Images missing alt text: 6/11
- Phone on page: Yes
- Contact form: Present below the fold
- Blog / proof content: Not found

Website quality score: 54/100

SEO opportunity score: 81/100

4) Organic / local SEO opportunity

Search demand for "roof repair Denver", "roof replacement Aurora", and storm-related queries is strong. Competitors outrank this site with dedicated service + city pages, FAQ schema, and recent project galleries. GBP looks claimed but under-optimized (few photos, inconsistent categories).

Priority local SEO moves:

- Build roof-repair, roof-replacement, and storm-damage pages for Denver + 3 suburbs
- Add LocalBusiness + Service schema
- Align NAP across GBP, Yelp, and website footer
- Publish weekly project / insurance FAQ posts

5) Paid ads & PPC opportunity

PPC opportunity score: 76/100. The site can support Local Services Ads and Google Search once landing pages convert. Current homepage is not ad-ready (slow quote path, no trust bar above the fold).

Recommended launch:

- LSA for Roofing in Denver metro
- Search campaigns for high-intent repair + replacement keywords
- Dedicated landing pages with call tracking + form
- Starting test budget: \$80–\$150/day with weekly creative refresh

6) Marketing & content opportunity

Marketing opportunity score: 72/100. Reviews are a strength; visual proof and storm-season content are weak. Instagram is sparse. No email nurture for estimate follow-up is visible.

Channel priorities:

- Review request automation after closed jobs
- Before/after photo system for social + GBP
- Storm-season SMS/email to past customers
- Partner referrals with local realtors / property managers

7) Priority recommendations (highest ROI first)

1) Rewrite homepage + add above-the-fold quote CTA and click-to-call.

2) Add LocalBusiness schema and unique title/meta on all key pages.

3) Launch 4 city/service landing pages for paid + organic.

4) Install call tracking and form notifications.

5) Claim/optimize GBP categories, photos, and Q&A.

6) Start Local Services Ads with conversion-ready pages.

7) Stand up a review request workflow (text + email).

8) Publish weekly project proofs and insurance FAQs.

8) 30-day action plan

Week 1: Technical cleanup (meta, schema, CTA, tracking).

Week 2: Service/city pages live; GBP photo + category refresh.

Week 3: LSA / Search ads live; review automation on.

Week 4: Measure booked estimates; expand winning suburbs and offers.

9) Suggested agency outreach pitch

Hi — I reviewed Summit Peak Roofing's online presence in Denver. You have strong reviews (4.6), but the site is leaving local search and paid demand on the table: missing schema, thin service pages, and a slow quote path. We put together a 30-day plan covering SEO fixes, city pages, and Local Services Ads readiness. Open to a quick 15-minute walkthrough this week?
